

WP7 Project Management

H2020 LEIT RIA - ICT-10-2016 – Software Technology

2016/12/01 – 2019/11/30

Caroline Landry
Project Technical Manager
INRIA, France

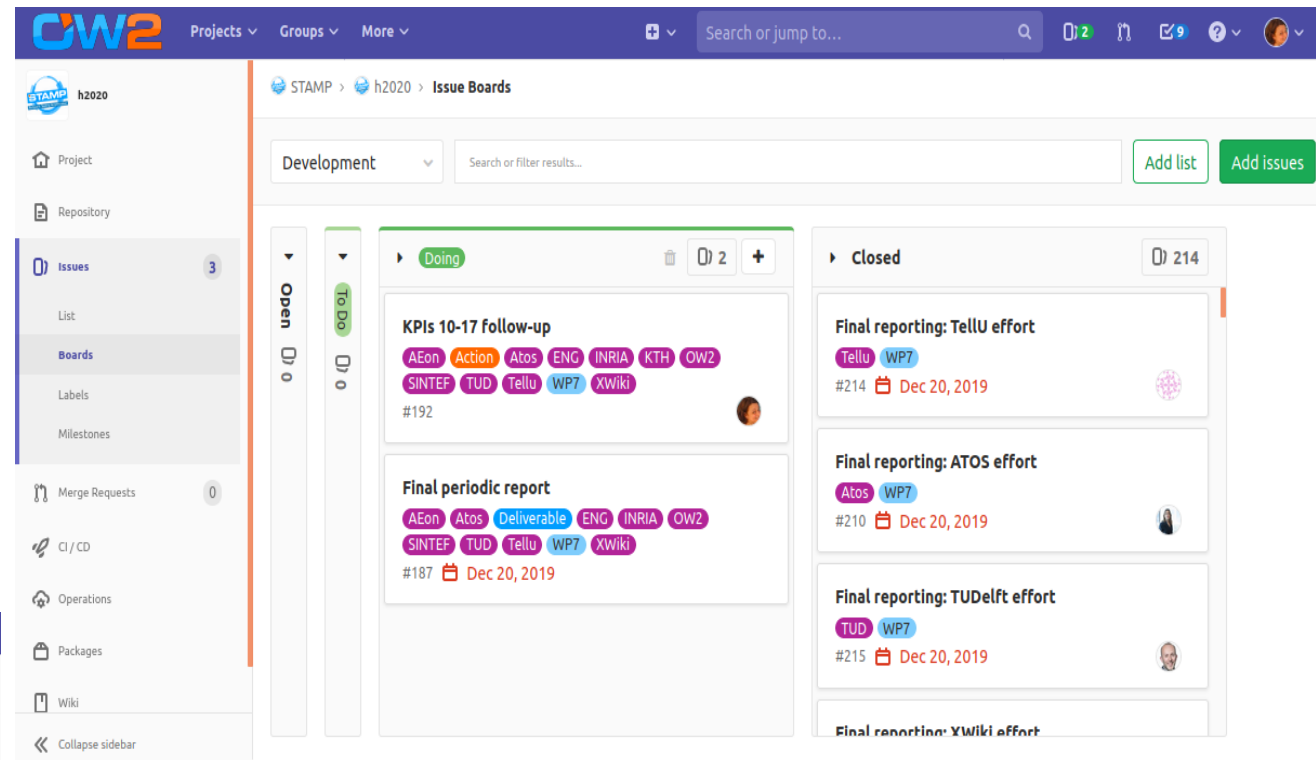

Tracking (1)

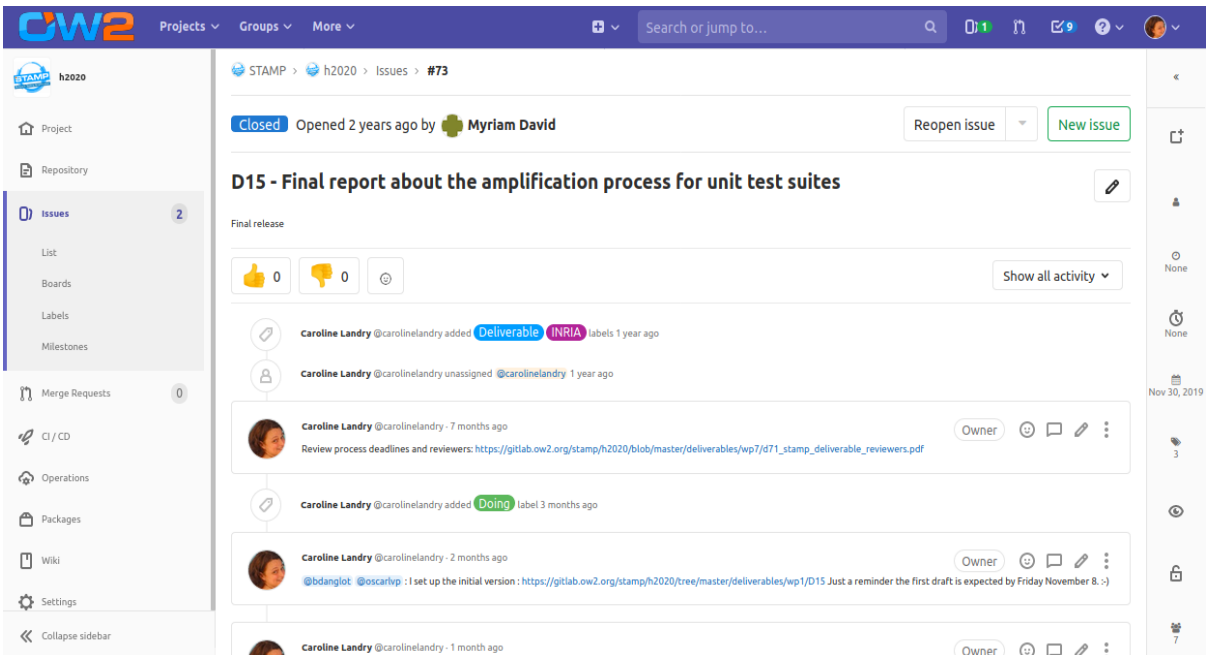

- Meetings
 - Monthly calls with all partners
 - WP5 & WP4: regulars calls with all partners
 - WP1, WP2 and WP3: dedicated calls and working sessions by video conferences
 - KTH/INRIA: weekly calls
 - 9 in-person meetings

Tracking (2)

- Deliverables
- Milestones
- Actions

This screenshot shows the OW2 Issue Boards interface. The top navigation bar includes 'Projects', 'Groups', and 'More' menus, along with a search bar and user profile icons. The left sidebar lists navigation options: Project, Repository, Issues (selected), Boards, Labels, Milestones, Merge Requests, CI / CD, Operations, Packages, Wiki, and Collapse sidebar. The main content area displays the 'STAMP > h2020 > Issue Boards' view. It features a 'Development' dropdown and a search filter. The board is organized into columns: 'Open' (0 items), 'To Do' (0 items), 'Doing' (2 items), and 'Closed' (214 items). The 'Doing' column contains two cards: 'KPIs 10-17 follow-up' (card #192) and 'Final periodic report' (card #187). The 'Closed' column lists several reporting efforts: 'Final reporting: TellU effort' (#214), 'Final reporting: ATOS effort' (#210), 'Final reporting: TUDelft effort' (#215), and 'Final reporting: XWiki effort'.

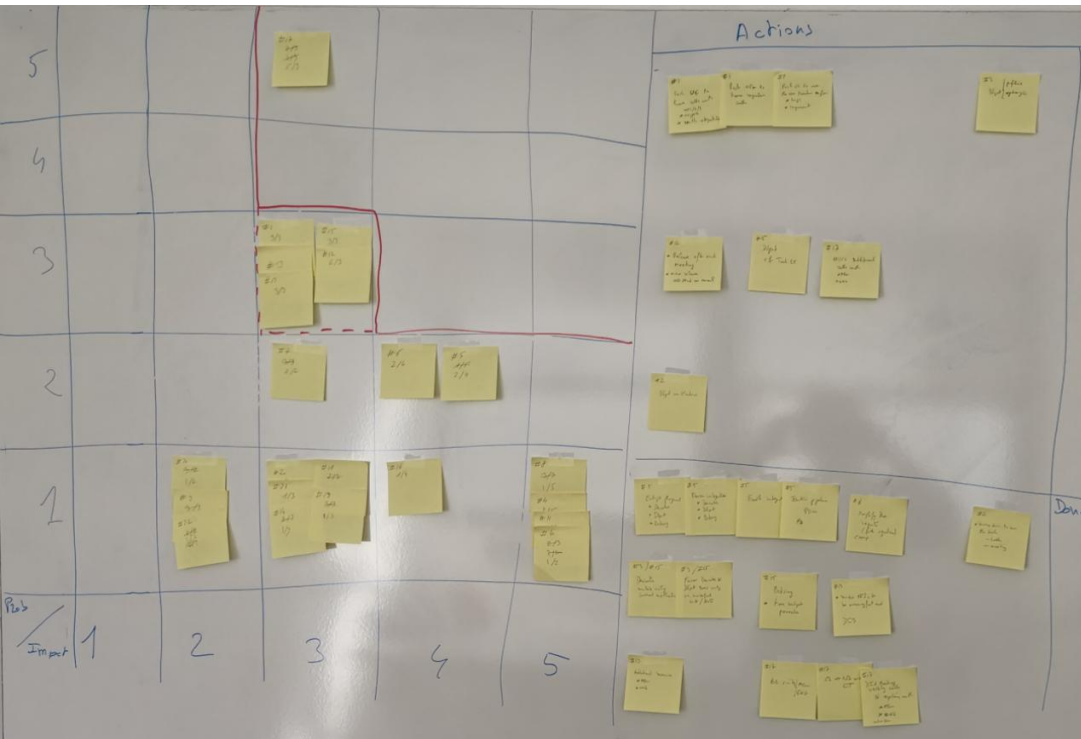

This screenshot shows the OW2 Issues interface for issue #73. The top navigation bar is identical to the previous screenshot. The left sidebar is also identical. The main content area displays 'STAMP > h2020 > Issues > #73'. The issue is marked as 'Closed' and was opened 2 years ago by Myriam David. The title is 'D15 - Final report about the amplification process for unit test suites'. Below the title, there are reaction buttons (thumbs up, thumbs down, and a speech bubble) and a 'Show all activity' dropdown. The activity feed shows several updates from Caroline Landry, including adding 'Deliverable' and 'Doing' labels, and a reminder about the initial version of the report.

	A	B	C	D	E	F	G	H	I
1		Reporting period : M18 - M36							
2	#	Description	WP	Proba bility	Impact	Level	Mitigation measures applied (yes/no)	Risk materialized (yes/no)	Comments
13		No metrics were found to evaluate a concrete feature/requirement, or there are not available means to measure them providing quantitative measures Impact: The evaluation will not be able to provide quantitative figures	1,2,3, 4,5	3	3	9	yes	yes	KPIs revised by industrial partners and a guide on how to measure each metric is provided with the metric. Some metrics still difficult to compare with baseline (eg. what is a "crash test" in an existing test suite ? What is exactly a "flaky test" ?)
14		Very limited interest in STAMP Impact: Failure to achieve dissemination and exploitation indicators.	6	2	3	6	no	no	Over all several hundreds of DevOps attended STAMP webinars, workshops, talks and meetups, showing an interest for software testing automation tools.
15		Poor performance of the resulting platform Impact: Exploitation of project results becomes uncertain.	5,6	3	3	9	no	no	Extreme mutation reduces the execution time of mutation testing tools. The integration of tools in the developer toolchain is also key, as beta testers have noted in their feedbacks. However, no one has raised performance issues on the STAMP tools.
16		Competition appears with same value proposal Impact: Exploitation of project results becomes	6	1	4	4	no	no	No real competition at this time, as explained in the D6.5 report. Offering the STAMP toolset as a Service is a clear market opportunity.

Tracking (4)

- Unplanned activities (PR2)
 - Amendment
 - Change tasks assignments of T1.4 and 5.4 from ATOS Turkey to ATOS IT
 - Update WP3 objectives, task 3.2, deliverables D3.2 and D3.3 deadline
 - Update WP4 task 4.1
 - Update WP5 project KPIs
 - Updated version of the DoA part A
 - Updated version of the DoA part B
 - Request letter
 - Document reviews
 - Revised version of D1.2
 - Revised version of D3.1
 - Revised version of D3.2
 - Additional project interim review

Effort (4)

- KTH
 - planned efforts were underestimated when moving
- INRIA
 - Some PMs moved from WP3 to WP1
 - Some additional PMs allocated to WP1 to achieve the industrial maturity level
 - Unplanned tasks (additional review, amendments and detailed management of some partners)
- SINTEF
 - Mainly additional effort on WP2 because of turnover

Effort (5)

- TUDelft
 - Effort was divided differently mainly because of WP3 reorientation after mid-term review
- OW2
 - Difficulty to hire people impacted WP1/WP2
 - PMs re-allocated to WP5 to implement CI tools
 - More dissemination than planned and additional effort on exploitation and business plan to help Activeeon (WP6)
- XWiki
 - Technical work in WP1/WP2 faster than planned
 - Effort re-allocated mainly on WP5 to achieve the metrics and the KPIs

Effort (6)

- Tellu

- WP3 contribution faster than planned and so some effort shifted from WP3 to WP2
- Additional effort on WP5 in the final year to work on TelluCloud

- Activeeon

- 2PMs achieved by INRIA on WP1 because of turnover (PR1)
- More effort on WP2/WP3/WP4/WP5 because of 1 senior engineer replaced by 2 junior engineers
